CNC Precision Automatic Lathe

P034E

Opposed gang tool
Swissturn for micro parts.

B0386E-III

New model of large Swissturn B0 series.
Robust machine increases productivity.

B0206E-III

Advanced model improving
performance.

HS327-5AX

Swissturn with B-axis tool post
enables high speed machining
of the complicated workpiece.

BW209ZE

Ultimate reduction of cycle time
on the complex work with
independent opposed cross and Z3
axis movement on rear tool post

HS38MH-5AX

Perfect integration of machining center
and automatic lathe
Productive and complex machining from a bar.

CNC Lathe

M08SYE-II

High-end model of the series.

C300HE

Flexibly correspond to
bar machine or chucker
according to the work

TMA8FE

Complete processing with sole machine
Enhanced-performance turning center
with excellent cost-performance.

Accuracy, Speed and Rigidity

TSUGAMI is recognized worldwide for superior precision machine tools.
